

MICROSOFT OFFICE 365

Email and Productivity Applications in the Cloud

CLOUD COMPUTING AND ADVANCED SECURITY COMBINE TO CREATE MODERN EMAIL

Microsoft Office 365 is a cloud-based software plus services offering from Microsoft. Used by businesses (and individuals) for email and productivity applications through hosted versions of Exchange, Skype, and SharePoint with access to the latest versions of all Office software (Word, Excel, PowerPoint, etc.). This is a great alternative to hosting your own email server, as Microsoft will handle the responsibility of upgrades and maintenance, with very limited downtime.

BENEFITS OF MIGRATING TO THE CLOUD

- Access your data from anywhere in the world, on any device
- Lower data center costs, as fewer physical servers are required
- Reduced IT workload
- Fewer help desk calls
- Increased Up-time

BENEFITS OF OFFICE 365

- Always have the latest version of Microsoft Office
- Adjustable licenses based on user counts
- Completely Customizable
- Fully Encrypted Emails
- Multi-Factor Authentication for greater security
- Real-time Co-Authoring
- Increased Up-time
